PROJECTS

- ❖ **Taskly – Full-Stack Task Management Application**
 - Project Link: <https://taskly-task-manager-icrv.vercel.app/>
 - Built a program through which we can navigate the mouse using hand gestures
 - Used mediapipe (library provided by google) to help with hand recognition and tracking and libraries like pyautogui and autopsy .
 - Features include left click, right click, copy and paste
- ❖ **Real Time Collaborative Code Editor**
 - Project Link: <https://real-time-codeeditor-mkbt.onrender.com>
 - Engineered a responsive, syntax-aware editor using Monaco with support for multi-file switching and live language updates
 - Implemented peer-to-peer typing indicators, chat messaging, and file selection sync using Socket.IO.
 - Integrated frontend build with Express backend for unified deployment and static asset serving.
 - Styled chat interface with Messenger-like bubbles and auto-scroll for seamless UX.
- ❖ **Automating Machine Learning Web Application**
 - Project Link: <https://auto-machine-learning-web-app-dtc859novczeyppqycr4tfa.streamlit.app/>
 - Built a web application that automates the process of EDA and training of machine learning model
 - Takes a data file(CSV) as an input and can generate profile report and train the model according to the data
 - Used streamlit (an open source python library) to create front end
 - Uses pandas profiling library to generate EDA report
 - Uses PyCaret (python library) to create several machine learning model and save the best model among them.
 - Application has a download option as well to download the trained model
 - Can train both Regression and Classification model.
